

Call for Mentors.

Are you a seasoned business professional?
Would you like to help mentor startup companies?
The Biz Foundry is looking for Mentors to work with our entrepreneurs.

Great business mentors can have an enormous impact on early-stage startups. Their connections can open doors that would otherwise be closed and their experiences can save entrepreneurs from suffering from the same startup mistakes they've already made.

Every great entrepreneur can remember the mentorship they received during the early stages of their company, and how that leadership,

encouragement, and advice propelled them to success. If that entrepreneur is you, this is your chance to pass success on to other budding entrepreneurs.

3 Types of Mentors We Are Looking For.

1. Functional Mentors are on-call professionals that are there to lend a hand on a one-off basis, ranging from accounting and marketing advice, to making introductions for certain needed contacts, helping with an event, or other possible services.

2. Engaged Mentors work with one or more companies for 3-9 hours/month for a year, or otherwise defined time.

3. Lead Mentors work with one or more companies for 10+ hours/month for a year, or otherwise defined time period, have likely founded a company and/or have significant related industry expertise, and will lend guidance and support to each entrepreneur at every step of the engagement.
