Applications being accepted for internships and research opportunities with Oak Ridge Office of Environmental Management Program

ORAU-administered program gives students and recent graduates opportunities to explore a federal career with the U.S. Department of Energy

OAK RIDGE, Tenn.—ORAU and the U.S. Department of Energy are currently seeking students and recent graduates for paid internships and research opportunities in a variety of disciplines through the Oak Ridge Office of Environmental Management Science Education and Internship Program.

The mission of OREM is to remove environmental legacies resulting from decades of uranium enrichment activities and energy and scientific research. Students and recent college graduates will learn about this mission and receive specialized training and practical experience in the safe cleanup of environmental projects.

This workforce development program offers internships and research opportunities in disciplines ranging from chemical, nuclear and other engineering fields to environmental and physical sciences, information technology and occupational safety and health. The goal is to give participants a chance to explore a federal career with DOE and to create a pipeline of highly qualified professionals to support critical DOE missions for years to come.

Appointments generally take place during the summer, beginning in June, or part-time appointments may occur during the semester depending on the requirements of the position. Internships or research opportunities will be located at the Oak Ridge Office of Environmental Management. The program provides stipends, allowances for health insurance and research-related expenses, as well as limited reimbursement for relocation and travel expenses, all of which vary by position.

To be eligible, applicants must be U.S. citizens, 18 years of age, and undergraduate or graduate students or post-graduates. For more information on eligibility requirements, please see [frequently asked questions](#) guidance provided on the program website.

Program opportunities are administered by ORAU, through the Oak Ridge Institute for Science and Education contract with DOE. More information as well as an online application is available on the [program website](#).

ORAU provides innovative scientific and technical solutions to advance national priorities in science, health, education and national security. Through specialized teams of experts, unique laboratory capabilities and access to a consortium of more than 100 major Ph.D.-granting institutions, ORAU works with federal, state, local and commercial customers to advance national priorities and serve the public interest. A 501(c)(3) nonprofit corporation and federal contractor, ORAU manages the Oak Ridge Institute for Science and Education for the U.S. Department of Energy. www.ornl.gov
