TEAMS

Branch Technology - GIGTANK

Branch Technology combines freeform 3D printing technology, large scale industrial robots and conventional construction materials to create buildings without design limits.

DivorceSecure - Start Co.

DivorceSecure is a workflow and collaboration platform for divorce attorneys to automate and streamline the intake process, create a negotiation strategy based on the clients' preferences.

Innovasan - CO.LAB

Innovasan has created the only technology solution for affordable, sustainable and safe on-site treatment of fluid medical waste in hospitals, surgery centers and other medical treatment facilities.

KaraoQ - Project Music

KaraoQ develops technologies that enhance how people interact and engage in venues by digitizing the antiquated karaoke experience for nightlife enthusiasts.

LendMed - Start Co.

LendMed's platform provides hospitals a controlled environment for borrowing and lending medical supplies, allowing them to initiate requests, approve requests, and keep an itemized accounting system of debts.

Preteckt - Start Co.

Preteckt predicts vehicle breakdowns before they happen through hardware that is placed into the vehicle's sensor data, which extracts over 16,000 signals in real-time.

Remix Hits - Project Music

Remix Hits turns licensed hit songs into software to aid music creators in the sampling/remix process, along with an automated licensing system that instantly determines royalty splits upon upload.

Sing and Spell - MediaWorks:

Sing and Spell has created an animated, musical program that teaches pre-preschoolers alphabet letter basics through lessons and original songs.
