

Creative Recycling for a Changing World

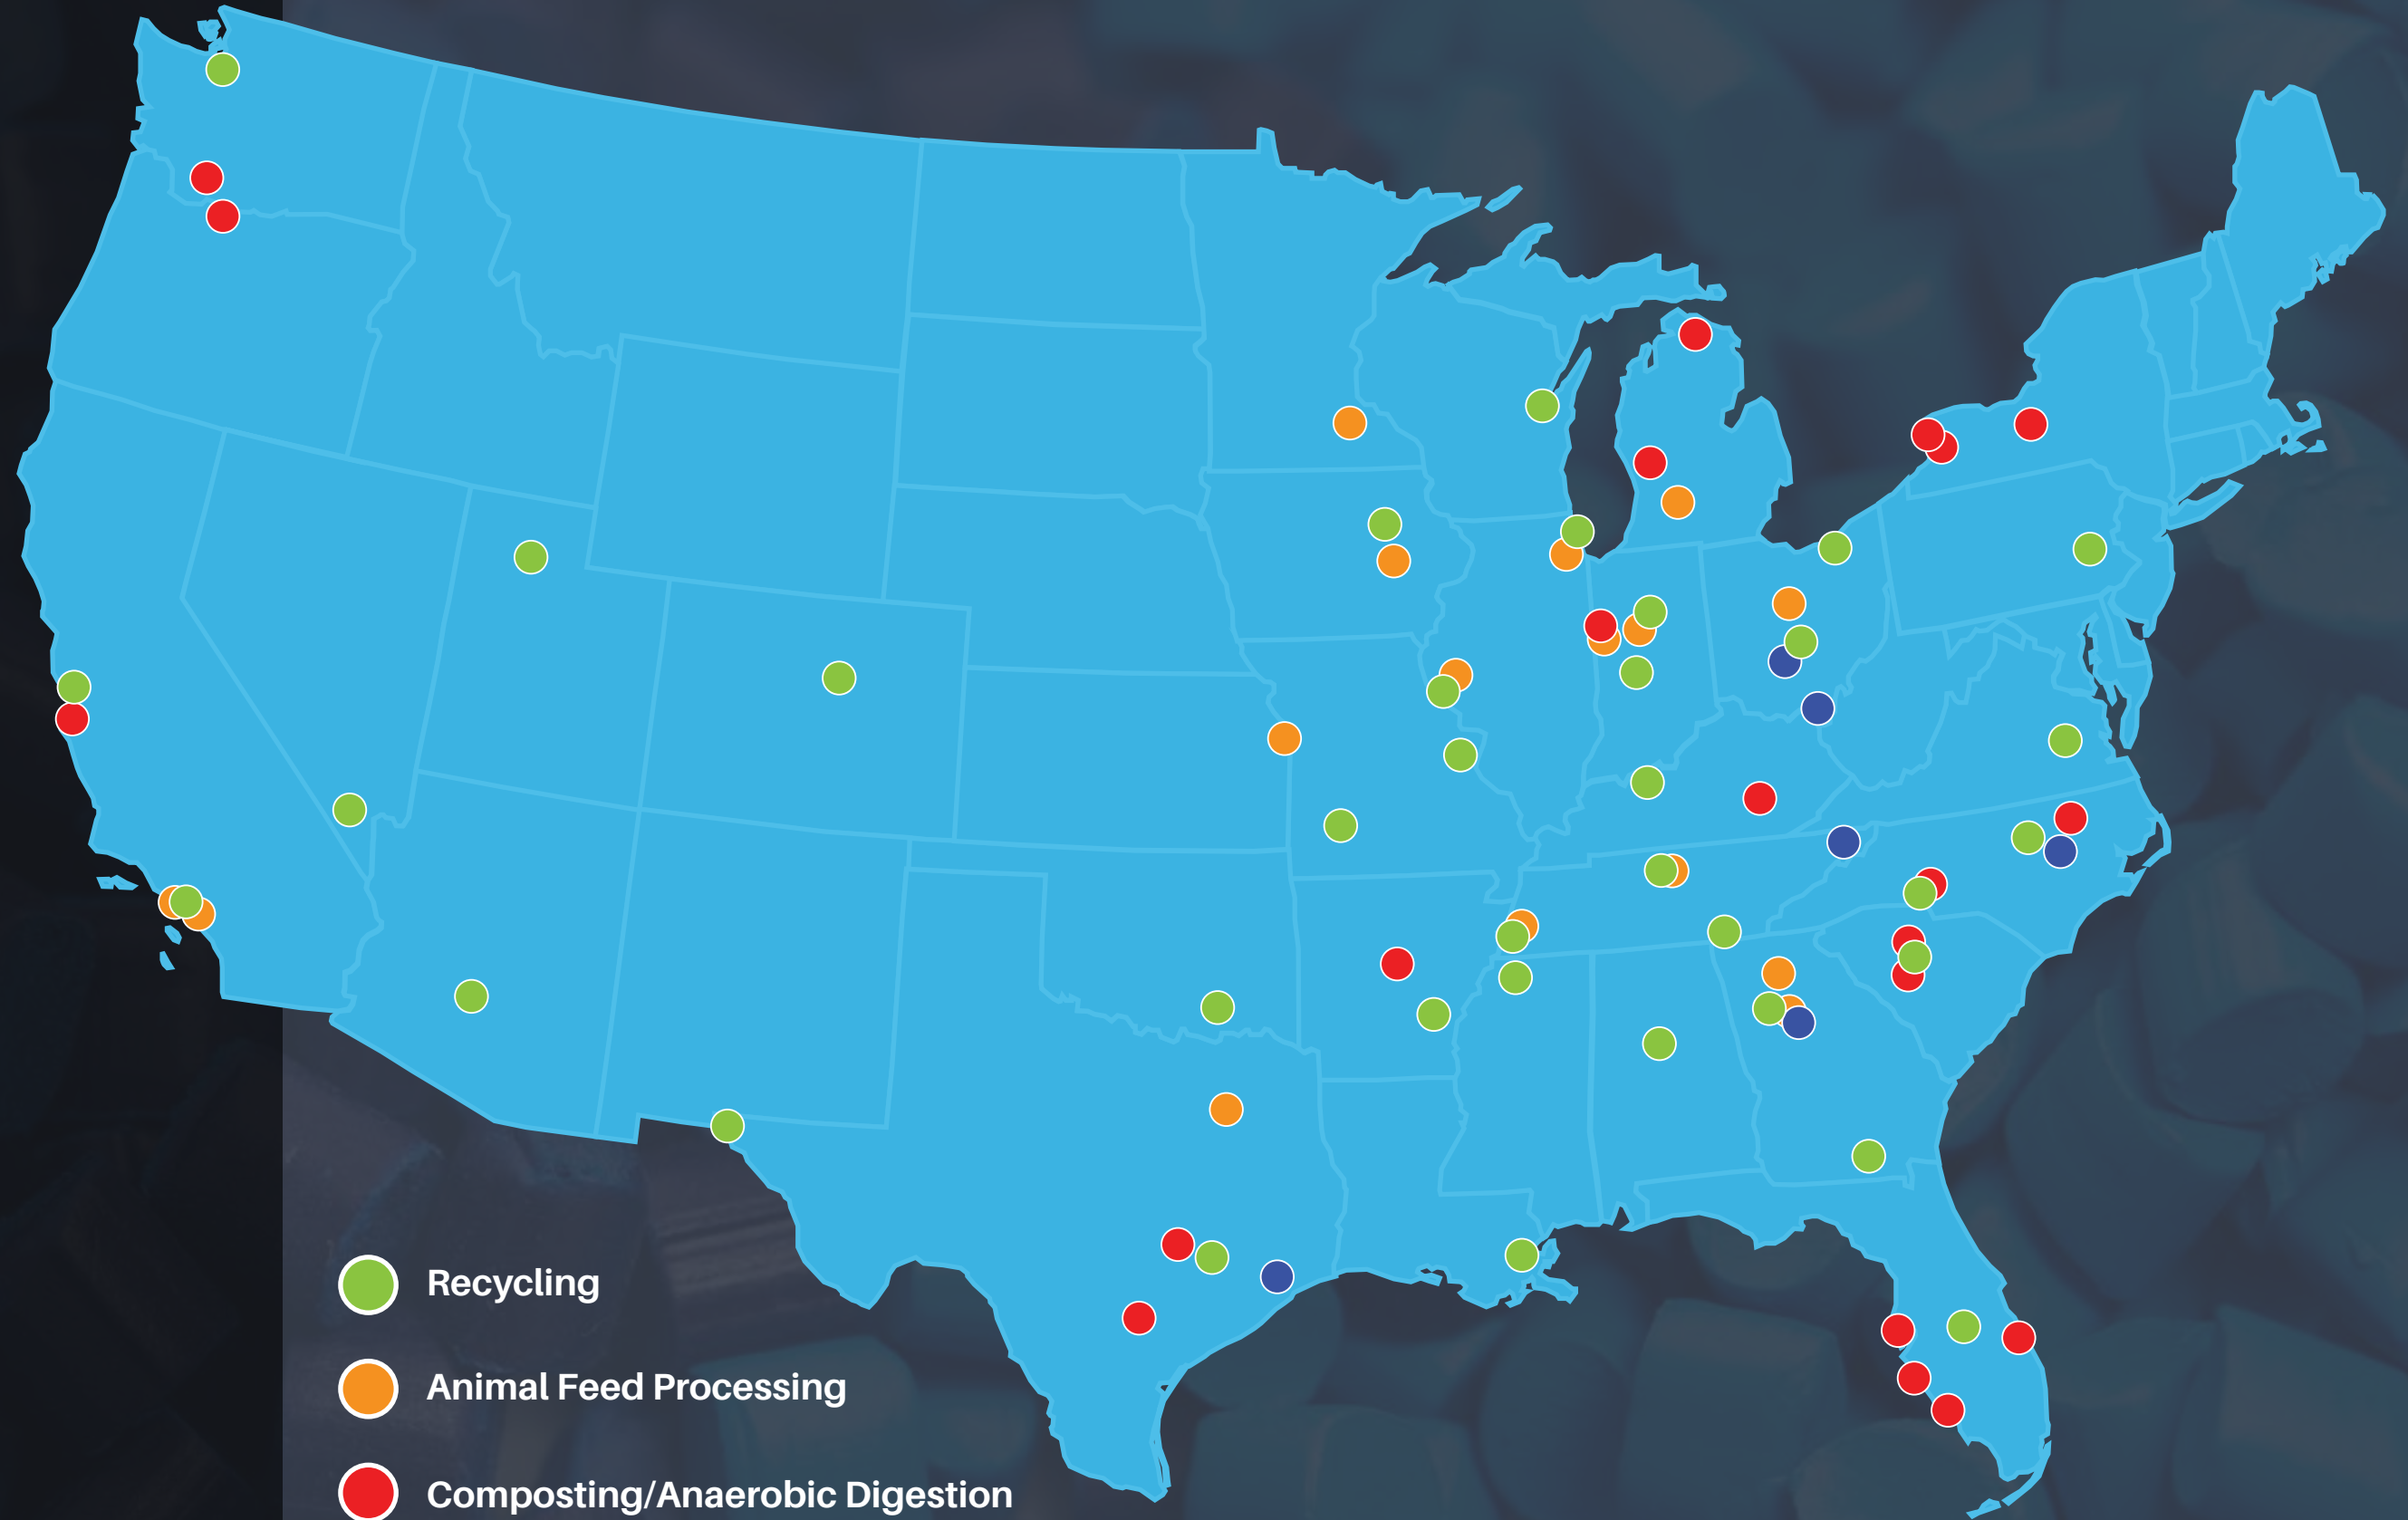

isustainrecycling.com

WHO WE ARE

As a National Waste & Recycling Provider, iSustain provides creative solutions and measurable solutions for all your waste and recycling streams. The iSustain team then implements and manages those sustainability solutions from start to finish utilizing our vast collaboration network.

- Servicing throughout United States, Mexico and Canada
- Plastic Circularity Solutions
- Proven Cost Reduction
- Equipment, Training, Tracking and Logistics
- One Provider, Many Custom Solutions

-  Recycling
-  Animal Feed Processing
-  Composting/Anaerobic Digestion
-  Advance Recycling

DO YOU HAVE THESE PROBLEMS?

- My waste expense is over \$5,000 per month.
- I need to increase my sustainability efforts.
- I have recyclables in my waste stream.
- My recycler is rejecting some of my waste.

With the most experienced customer service team in the industry, we believe that we can solve these problems with our comprehensive recycling solutions. iSustain can work with you to improve recycling rates, select the right recycling equipment, reduce your logistics costs and improve your bottom line.

OUR SOLUTION

Equipment

Utilizing the latest in cloud technology, iSustain is able to monitor your waste stream remotely.

Networking

iSustain is connected with vendors across the nation who are looking to purchase your plastic waste.

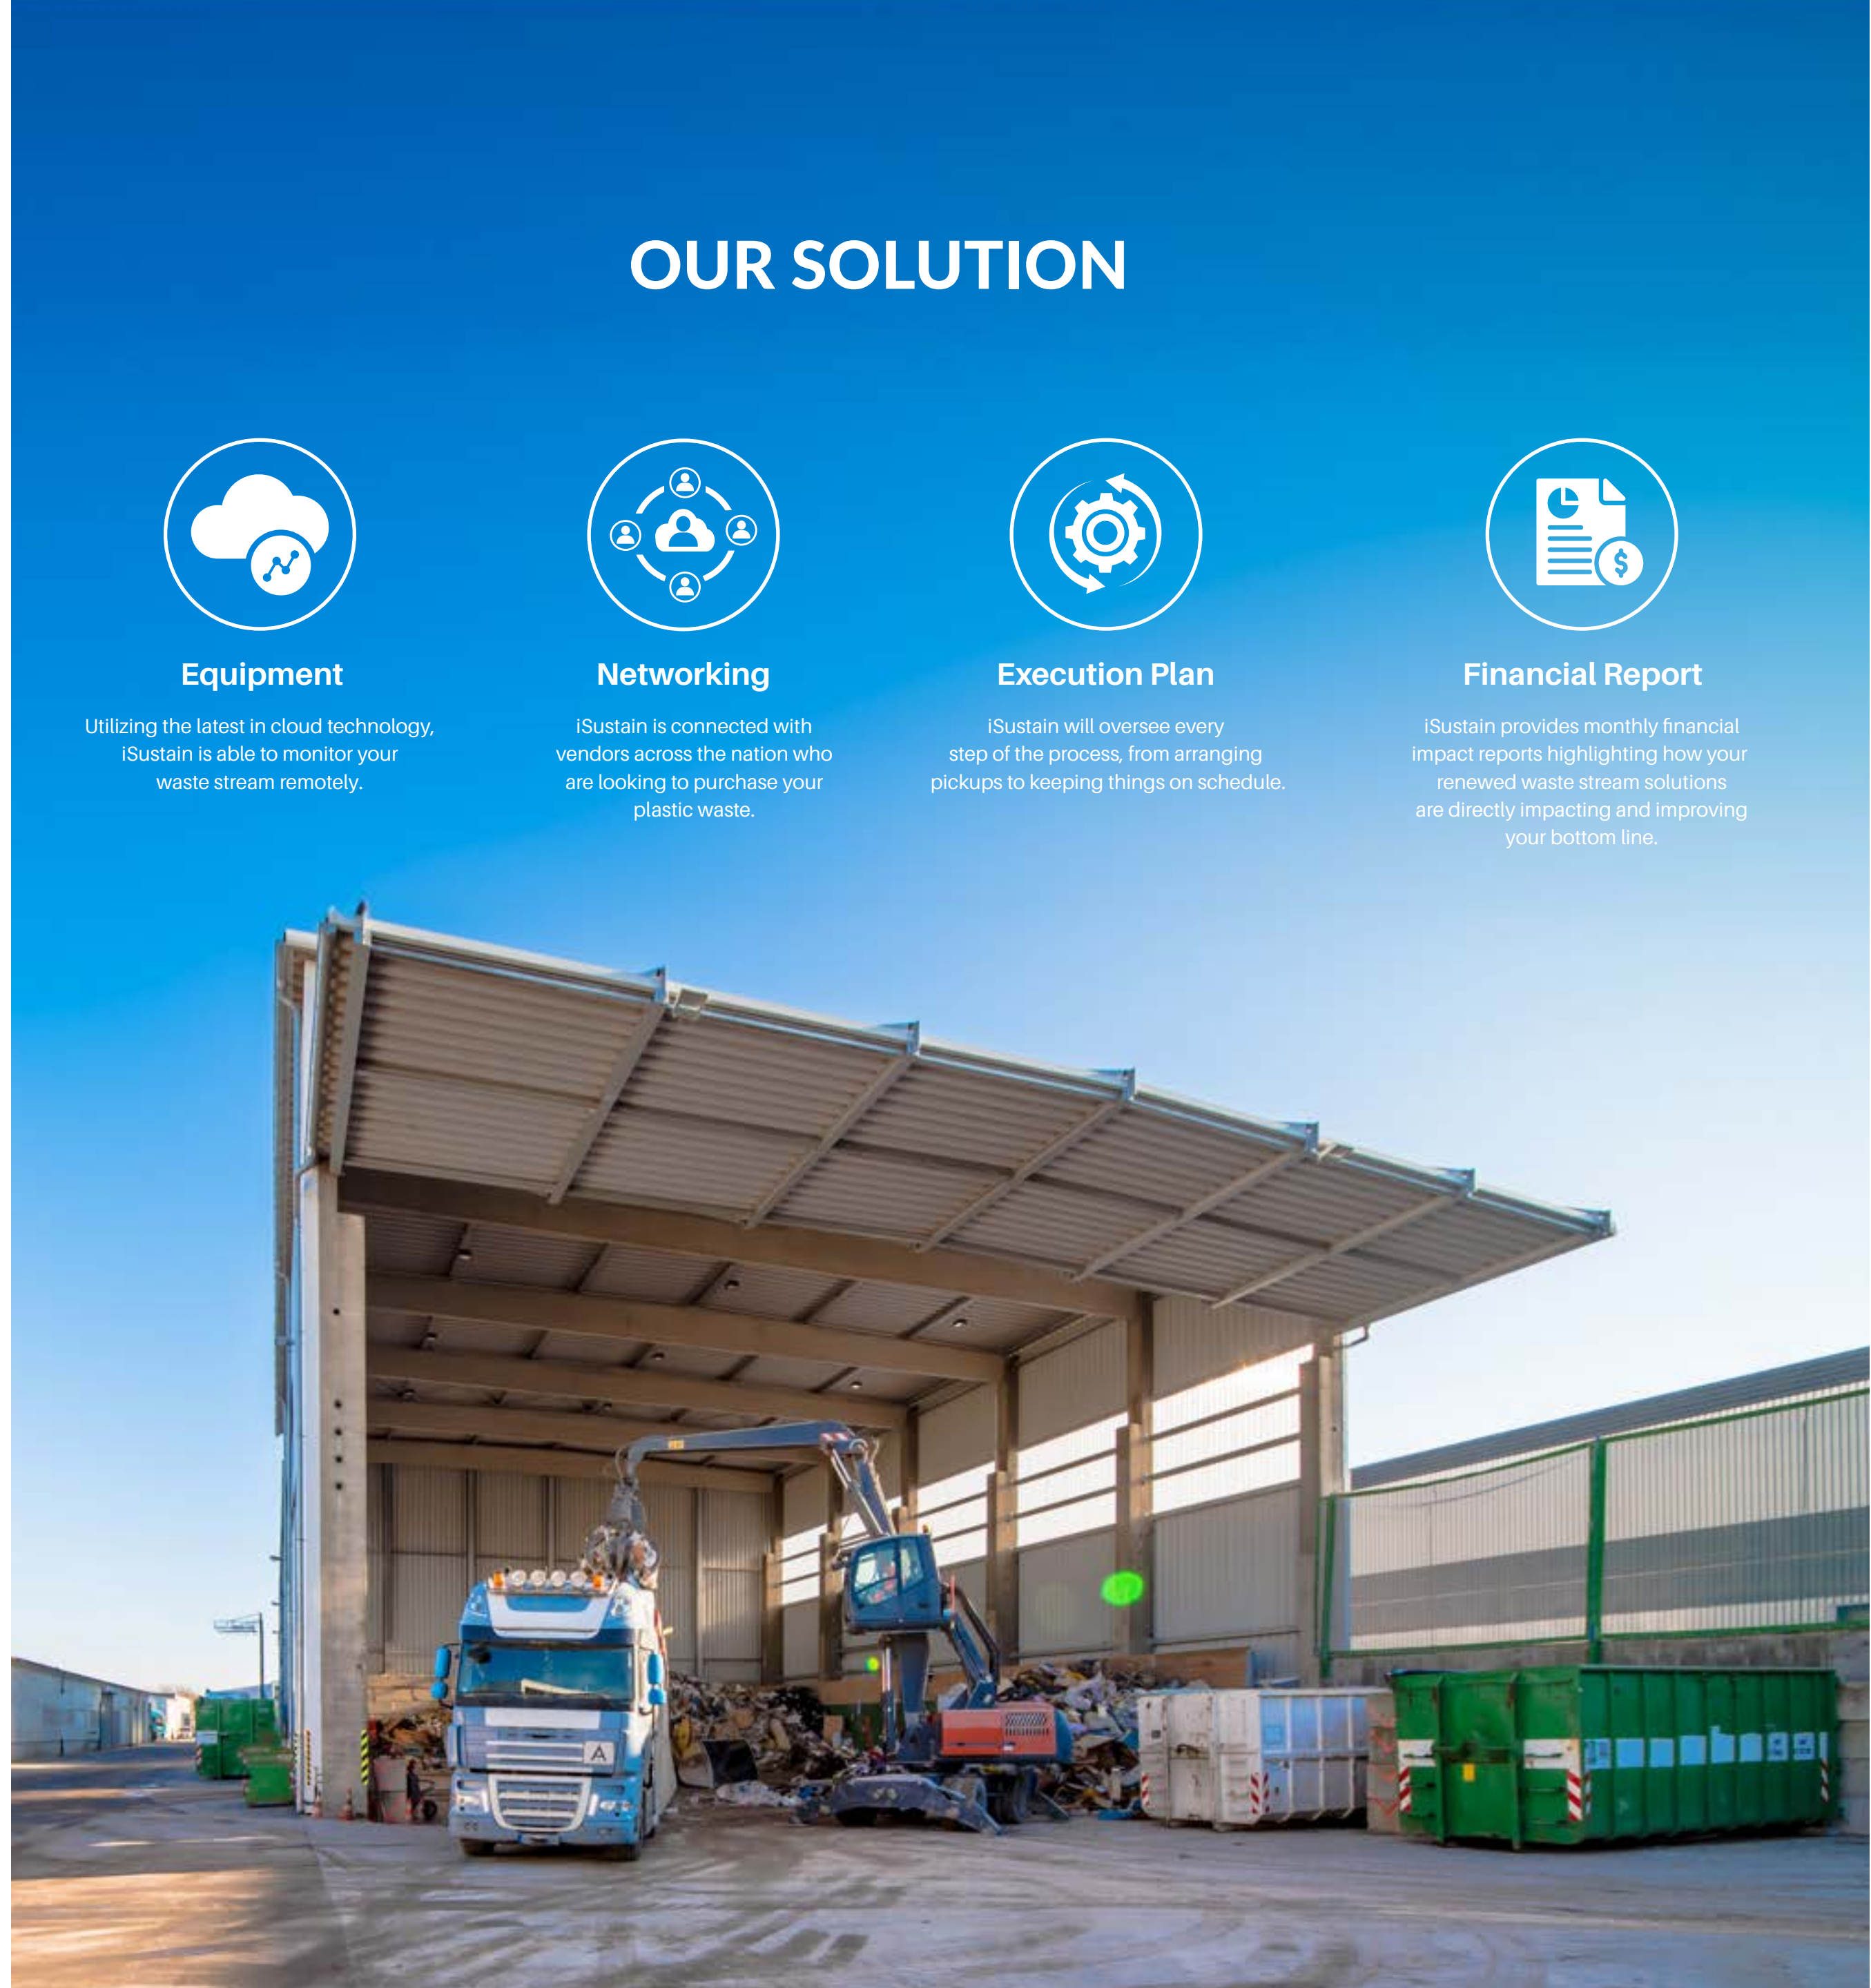

Execution Plan

iSustain will oversee every step of the process, from arranging pickups to keeping things on schedule.

Financial Report

iSustain provides monthly financial impact reports highlighting how your renewed waste stream solutions are directly impacting and improving your bottom line.

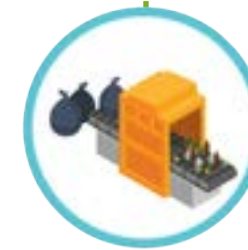

OUR PROCESS

Our 5 Step Process to Solving Your Waste Problems

Facilities Review

Analyze available equipment at the facility.

Process Documentation

Analyze the processes the facility uses to dispose of waste.

Waste Analysis

Analyze the different waste types a facility produces.

Financial Assessment

Analyze waste and recycling processes/finances to improve landfill diversion and financial return.

Proposal Presentation

Develop a proposal based on waste audit data and review with the goal of offering solutions that reduce the costs of waste removal and divert as much waste as possible from landfills.

OUR MISSION

- To make recycling easier for you.
- To help you foster changes in behavior among employees, clients, and communities to manage and reduce carbon footprints.
- To help you build a positive brand reputation, political capital and business value through improved sustainability efforts.
- To change the environmental impact of your business through unmatched service and to inspire, educate and drive change in the world.

GIVING BACK AND DRIVING CHANGE

Community Spirit

iSustain prioritizes community spirit and environmental stewardship through partnerships with several nonprofit organizations.

Keep the Tennessee River Beautiful (KTNRB) is a 501(c)3 nonprofit organization that holds the distinction of being the inaugural Keep America Beautiful affiliate dedicated exclusively to the preservation of a river. iSustain partners with KTNRB every year and hosts a cleanup to remove thousands of pounds of trash.

iSustain committed \$200,000 to the University of Tennessee, Knoxville, which will receive a one-to-one match to create a first of its kind \$400,000 Sustainability Endowment. This endowment will support graduate students who are passionate about protecting and improving the health of the natural environment, both in business and in their personal lives.

iSustain partners with the Tennessee Aquarium to combat plastic pollution in streams, rivers, and oceans. This partnership extends support to local watershed initiatives and involves collaborative, ongoing research aimed at addressing the challenges posed by microplastics and their environmental impact.

PROCUREMENT PARTNER

iSustain takes the headache out of supplying your technology with recycled feedstock.

- iSustain specializes in procurement. Our team has vast hands-on experience sourcing, qualifying and procuring the auditable and certifiable feedstocks that meet our customers' specific needs.
- The process of purchasing goods and services often involves many interrelated activities. All these activities can be time-consuming, complex and costly. iSustain solves all of these pain points and streamlines the procurement process.
- With iSustain, businesses can easily manage procurement, create efficiencies, and reduce costs, all while gaining complete control over their procurement processes.

The Procurement
